

HIP & RIDGE

Typical Sizes Shown

Framed shade structures are a low cost means of providing shade, particularly over high play equipment. In these applications framed shade structures require much less steel than cantilever shade structures for the same area of coverage.

Specifications

- Galvanised steel frame
- Wind Rated to W33 (33m/s, 120kph) or higher if required
- Large Coverage Area
- High Centre to Clear Equipment

Options

- Commercial Shade Cloth or PVC (Shade & Waterproof) (1)
- Sign Writing On Skins (2)
- Baseplate (Bolt down to existing concrete) (3)

Application

- Play Equipment
- Sandpits
- Carports
- School yards

Sizes

- Huge range of standard sizes available - see price sheet
- Custom sizes available as required
